Dublin Unified School District
Combined Annual and Five-year Developer Fees Report
Fiscal Year 2017/18

Background

Education Code Section 17620, et seq., and Government Code Section 65995, et seq., authorize school districts to impose fees on residential, commercial, and industrial developments to mitigate the impact of the development on a school district's facilities. On January 24, 2018, the State Allocation Board (SAB) acted to increase the Level I Developer Fees for both residential and commercial/industrial construction pursuant to Education Code Section 17620 and Government Code Section 65995.

The Level II fee for residential construction was decreased on June 13, 2018 from \$11.20 to \$11.00 per square foot of new residential construction. The Level II fee for commercial/industrial construction was unchanged at \$0.61 per square foot of new commercial/industrial construction. These fees are collected by the District at the maximum allowable rates. The District will perform its next Developer Fee Justification Study in 2020 concurrently with the SAB adjusting rates at its January 2020 meeting.

For the period July 1, 2017, through June 30, 2018, the Level I Developer Fee amounts were \$3.79 for residential \$0.61 for commercial/industrial.

Reporting Requirements

Government Code Section 66001 and Section 66006 require districts to be accountable for the fees that are collected and expended on both an annual and five-year basis.

Annual Report - The annual report focuses on the amount of developer fees collected and expended throughout the fiscal year and must include the following:

- Type of fees collected
- Amounts collected
- Beginning and ending balances of accounts
- Total amounts collected and interest earned
- Information regarding each project on which fees were expended
- Identification of any interfund transfers or loans, if applicable
- Amounts of any refunds

Five-year Report –The five-year report should include findings that:

- Identify the purposes to which the fees will be put
- Demonstrate the nexus between the fees and the purposes for which they are charged
- Identify the sources and amounts of funding anticipated to complete the financing of incomplete projects
- Identify the approximate date(s) when the funding referred in bullet point 3 above is expected to be deposited into the respective district account(s)

Findings – Although not required by a resolution, these findings are often made in the form of a resolution that is adopted by the governing board to facilitate compliance with the requisite codes and regulations. Findings Pertaining to Developers Fees, will be made available under separate cover.

Timeline – The annual report must be made within 180 days from the last day of the fiscal year. The five-year findings may be presented for approval by the governing board in conjunction with an annual report. It is more convenient for districts to prepare a comprehensive report each fiscal year that includes both the annual and five-year collection and expenditure information. By combining these two reports, it guards against the potential penalty of refunding unexpended developer fees for failure to timely report expenditures in the appropriate year.

Report Availability and Notification –The completed reports and applicable findings must be available for public review at least 15 days prior to approval by the governing board. Although a public hearing is not required, notices must be mailed to any interested party who files a written request for a mailed notification. A notice was posted on the District’s Web site and the information has been available since December 20, 2018. The District did not received any requests for mailed notification.
