

Percent Project: Paper Purchase Day

Make sure you know what type and color paper you need along with their quantities!

- 1) Visit the stores that have your paper choices. Read the store signs to find out about prices, deals and tax.
- 2) On your receipt for **that store**, record the items being purchased, their quantities and costs.
- 3) Show work using proportions or equations to find any discounts or taxes!
- 4) Continue filling out the receipt until you find the total cost.
- 5) Deduct the money on your check register to be sure you are within budget.
- 6) Take the paper with you. Continue as many times as needed.
